

## Aluminum Oxide

Aluminum Oxide is a fused alumina media that is angular, hard, and resilient which results in a fast cutting action. It's screened precisely, but because of its higher cost and its ability to be recovered over and over, Aluminum Oxide is best used in Blast Cabinets or Blast Rooms.

**Common Sizes:** 16, 24, 36, 60, 80, 100, 120, 150, 180, and 220.

**Moh's Hardness:** 8.0- 9.0 Average

### Packaging Types

Size	Average Profile
16 mesh	4.0 - 5.5 mils
24 mesh	3.5 - 5.0 mils
36 mesh	2.5 - 3.5 mils
54 mesh	1.8 - 2.4 mils
60 mesh	1.5 - 2.0 mils
80 mesh	1.0 - 1.5 mils
100 mesh	0.7 - 1.0 mils
120 mesh	0.4 - 0.6 mils
150 mesh	0.3 - 0.5 mils
180 mesh	0.2 - 0.4 mils
220 mesh	0.1 - 0.2 mils

50 lb Bag

2000 lb Pallet

50 lb Pail

2000 lb or 3000 lb Bag

55 Gallon Drum
